

KaWaBiz NET successfully ran a booth at "Kawasaki International Eco-Tech Fair 2018" (Results Report)

Kawasaki Water Business Network (KaWaBiz NET) ran a booth at "Kawasaki International Eco-Tech Fair 2018", which was held on February 1st (Thursday) and 2nd (Friday), 2018 at the Todoroki Arena.

This exhibit received 16,100 visitors over the 2 days it was held even though it was snowing on the first day, and our booth was visited by people from 13 foreign countries including Indonesia, Cambodia, Vietnam, China and Laos as well as by people who work for domestic companies and various organizations in Japan etc.

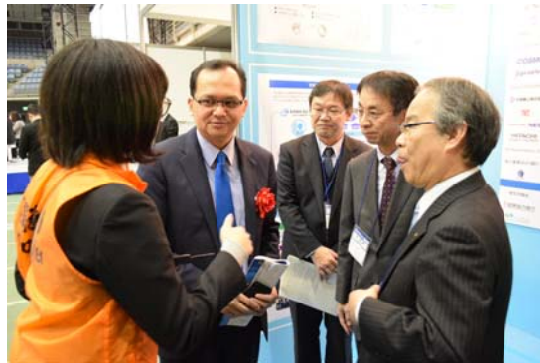

We were able to introduce outline of KaWaBiz NET as well as give details about current activities at our exhibition booth. This year, we greatly revamped the way we displayed our information. We displayed information on a new 46-inch monitor and distributed "Kawasaki Water Business Network Project Introduction" catalogs.

In addition, we discussed network construction, etc. with our visitors and exchanged business information. We distributed approximately 140 catalogs, which were written both in Japanese and English, to visitors, and many people expressed interest in the videos which introduced our projects.

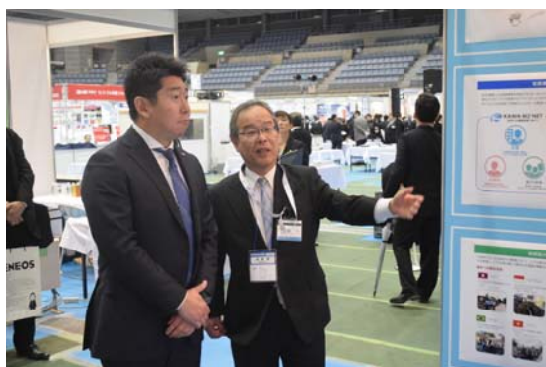

KaWaBiz NET continues to share its information both domestically and internationally by taking various opportunities to connect with other businesses in order to expand and develop.
