

## Report on JICA Partnership Program activities in Indonesia

The Kawasaki City Waterworks and Sewerage Bureau is currently implementing technical cooperation projects with the Indonesian cities of Bandung (sewerage) and Makassar (waterworks) utilizing the JICA Partnership Program.

Following are some of the Bureau's members working on site and a training session in Japan for technology transfer. One year after the start of both projects, progress reports were delivered to the Ministry of Public Works and Housing of Indonesia and other related organizations at each city in late January. Senior officials from each organization showed their understanding and support for these activities and confirmed their continued cooperation.
