

## JICA “Grassroots Technical Cooperation Project” Wrap-Up Seminar in Bandung City

The City of Kawasaki Waterworks and Sewerage Bureau is advancing a technical cooperation project in the sewerage sector in Bandung City, Indonesia, utilizing JICA's “Grassroots Technical Cooperation Project (Special Framework for Community Revitalization)”.

On January 21, 2026, a “Wrap-Up Seminar” was held locally to present the project's outcomes. Additionally, four KaWaBiz NET member companies promoted their products and technologies, attracting significant interest from many participants. The following day, January 22, meetings were held with Bandung City Hall, Bandung Regional Water Utility, and local companies, facilitating active discussions on future cooperation opportunities and technical challenges.

KaWaBiz NET will continue to support the global water business of our member companies by leveraging our platform to facilitate public-private partnerships.
